RING SIZING GUIDE

HOW TO USE THIS GUIDE

First, print this page on standard A4 paper. Make sure your **scaling is set to 100%** so the measurements stay true. Once printed, double-check the scale by measuring the box to the right with a ruler. Happy sizing!

Confirm Printed Paper Size

Please verify that the bar above measures exactly 2 inches (50mm). Any discrepancy in this measurement will lead to an incorrect ring size calculation.

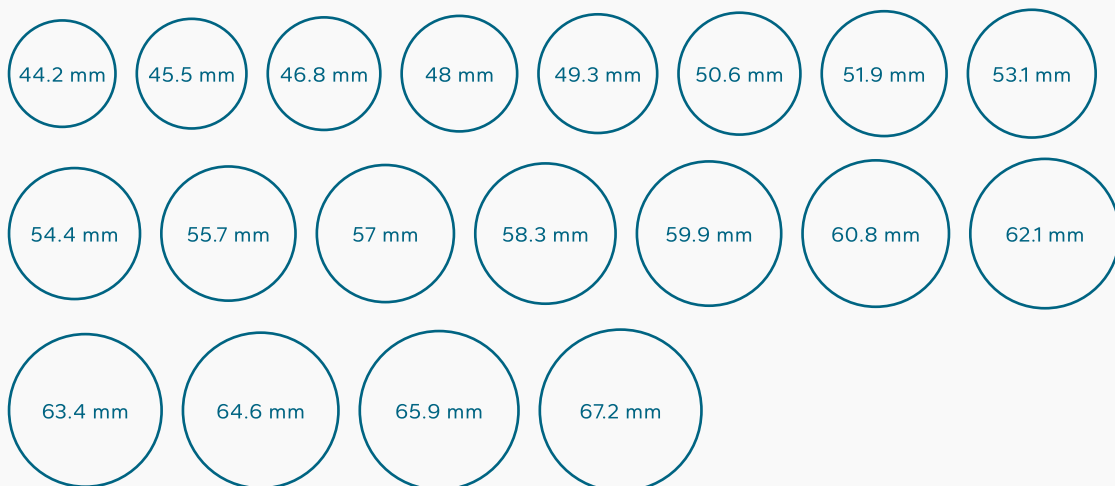

MEASURE AN EXISTING RING

You'll need a pair of scissors and an existing ring:

1. Select a ring that fits your desired finger perfectly.
2. Place the ring over the circles below, aligning its inner edge with the closest match. That is your size! If you find yourself between two sizes, please contact us to order a custom quarter size.

Ring Size Conversion Chart

The millimeter measurement reflects the internal circumference of each corresponding ring size.
